

# Weekly Update

Cappy Pugliese

4/14 - 4/25

## **Last week (4/14 - 4/18)**

- practiced presenting for advisory committee during lab meeting and got some feedback
- revised committee powerpoint and re-read some of the papers
- started grading for bio 1108
- recorded my teaching to do peer feedback for GRAD 6000

## **This week (4/21-4/25)**

### **Monday 4/21**

- had advisory committee meeting
  - went well
  - Dan proposed also looking at temporal variation (might be too much though)
- did some more grading for bio 1108 and wrote some quiz questions
- sent some emails
- checked on scripts for class

### **Tuesday 4/22**

- lab meeting got cancelled
- took the time to do lab work
  - got caught up with my weekly updates (I've been falling a bit behind with these)
  - test ran my haplotypcaller script with one bam file and realized I had to index it first
  - indexed and ran a second test and it worked

- created an accessionlist file with all the samples that had bam files
- created and ran an updated haplotypcaller script for all of the bam file samples

### **Wednesday 4/23**

- there was a dairy bar truck outside the pharmbio building so I was able to get ice cream before class :)
- it looks like some of the runs failed because they ran out of memory
- one of the scripts for my group project failed so I also need to trouble shoot that as well
- prepared to teach for class tomorrow

### **Thursday 4/24**

- tested out jigsaw discussion method (that I learned in GRAD 6000) in my lab section today, it seemed to go well!
- worked on trouble shooting group project script

### **Friday 4/25 + Weekend**

- worked on group project
